## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1 – 20 are allowed.

The Examiner agrees with the Applicant's arguments that while the first and second probes extend within the waveguide, the first and second substrate do not where the substrates are between waveguide sections while the interior of the waveguide coinciding with the substrate is hollow. Further, the substrates not being in the cavity of the waveguide would not be transmissive of the electromagnetic radiation (see claims 1, 9, and 17) thus the claims are found in condition for allowance.

### ***Conclusion***
